

Madeleine S. Gastonguay

(860) 578-7177 | madeleine.gastonguay@jax.org | <https://madeleine-gastonguay.netlify.app/>

Education

University of Connecticut, Storrs, CT

May 2020

Bachelor of Science, Applied Mathematics

Summa Cum Laude with Honors; GPA: 3.98/4.00

Minor: Bioinformatics

Thesis: A Quantitative Pipeline for The Identification of Combinations of Targets for Claudin-Low Triple Negative Breast Cancer Reversion

Advisor: Dr. Paola Vera-Licona

La Sorbonne University, Paris, France

January 2018-May 2018

Course de Civilisation Française

Research Experience

The Jackson Laboratory (JAX), Bar Harbor, ME

June 2020 - present

Research Data Analyst I

Topic: A Bayesian approach to mediation analysis of complex traits with measurement noise

- Contributed to the development and validation of an R package implementation of a Bayesian model selection approach to mediation analysis that is flexible in both data inputs and potential inferences, and extended it to moderated mediation
- Diagnosed the effect of measurement noise on the inference of mediation
- Applied these tools to better understand the mechanism underlying the effects of sex and diet on protein expression in the livers of genetically diverse mice

UConn Health Center for Quantitative Medicine, Farmington, CT

September 2018 - May 2020

Undergraduate Research Assistant

Topic: A quantitative pipeline for cancer reversion analysis in triple negative breast cancer

- Awarded a Summer Undergraduate Research Fund through UConn to fund work
- Constructed a static intracellular signaling network for a claudin-low triple negative breast cancer (CL TNBC) cell line with multi-omics data using Cytoscape and GeneXplain
- Applied a structure-based control method for nonlinear systems, implemented in python, to identify putative targets that steer the system to any desired attractor
- Conducted virtual screenings using the topology of the network and a signal propagation algorithm to identify concerted perturbations of control targets resulting in reversion of the CL TNBC phenotype

Metrum Research Group, Simsbury, CT

June - August 2018

Summer Intern

Topic: An open and general maternal-fetal physiologically-based pharmacokinetic model for drugs metabolized by cytochromes P450 isoenzymes

- Modeled maternal and fetal drug exposures at different gestational ages by incorporating anatomical, biochemical, and physiological changes associated with pregnancy as a system of differential equations using R and *mrgsolve*
- Performed local sensitivity analysis, optimized model parameters, and validated the model by comparing model predictions to external published data

University of Connecticut, Department of Molecular and Cellular Biology, Storrs, CT

January - September 2017

Undergraduate Research Assistant/Holster Scholar

Topic: The effect of host genetic variability on Epstein Barr Virus (EBV)-derived cancer susceptibility

- Reviewed relevant literature to identify genes that may impact EBV-derived cancer susceptibility
- Used wet lab techniques such as Polymerase Chain Reactions, Gel Electrophoresis, and Sanger Sequencing to sequence the genes of interest in several EBV-derived cancer cell lines and a non-cancerous EBV control cell line
- Aligned the genetic sequence of target genes to identify common and distinct single nucleotide polymorphisms across EBV-derived cancer cell lines using the software Geneious and BLAST

Fellowships and Grants

Summer Undergraduate Research Fund, University of Connecticut Office of Undergraduate Research

May 2019

- Awarded funding for a 9 week summer research project

Holster Scholar, University of Connecticut Honors Program

May 2017

- Offered enrollment in a course to learn how to develop and write a project proposal
- Selected as one of 8 students awarded funding for a 10 week summer research project

Manuscripts in Preparation

Gastonguay, M. S., Keele, G. R., & Churchill, G. A. (2021). The impact of measurement noise in mediation analysis.

Selected Oral Presentations

- Gastonguay MS, Russell S, Freling R, Utsey K, and Elmokadem A, *Prediction of maternal-fetal exposures of CYP450-metabolized drugs using physiologic pharmacokinetic modeling implemented in R and mrgsolve.*, R/Pharma Conference, Cambridge, MA, August 23rd, 2019
- Gastonguay MS, Marazzi L, Vera-Licona P, *Identification of Combinations of Targets for Claudin-Low Triple Negative Breast Cancer Reversion*, UConn Center for Cell Analysis and Modeling Summer Seminar, July 26th, 2019
- Gastonguay MS, Russell S, Freling R, Utsey K, and Elmokadem A, *Development of an Open and General Physiologically Based Pharmacokinetic Model to Predict Maternal-Fetal Exposures for Drugs Metabolized by CYP Isoenzymes*, R/Medicine Conference, New Haven, CT, September 8th, 2018

Selected Poster Presentations

- Gastonguay MS, Marazzi L, Vera-Licona P, *Identification of Combinations of Pharmacologic Targets for Claudin-Low Triple Negative Breast Cancer Reversion*, International Society of Pharmacometrics Quantitative Systems Pharmacology Student Symposium, April 28th, 2021
- Gastonguay MS, Marazzi L, Vera-Licona P, *Identification of Combinations of Targets for Claudin-Low Triple Negative Breast Cancer Reversion*, Joint Meeting in Mathematics, Denver, CO, January 15th – 18th, 2020
- Gastonguay MS, Russell S, Freling R, Utsey K, and Elmokadem A, *Development of an Open-source Physiologically-Based Pharmacokinetic Model to Predict Maternal-Fetal Exposures of CYP450-Metabolized Drugs*, International Society of Pharmacometrics Regional Quantitative Systems Pharmacology Day, Princeton, NJ, July 16th, 2019

Honors and Awards

Blue Ribbon Poster Award , ISoP Quantitative Systems Pharmacology Student Symposium	April 2021
Dean's List , The University of Connecticut	Sept. 2016 - May 2020
Academic Excellence Scholarship , The University of Connecticut	Sept. 2016 - May 2020
Babbidge Scholar , The University of Connecticut	Dec. 2017, 2019
New England Scholar , The University of Connecticut	Dec. 2018

Skills & Certifications

Technical: R; basic Python, Matlab, SQL, Julia, and bash shell; Git; LaTeX; OpenRefine; High Performance Computing with SLURM; *mrgsolve*; *shiny*; *tidyverse*; *plotly*; JAGS; Bayesian Data Analysis

Wet Lab: Polymerase Chain Reactions, Gel Electrophoresis, Gel Extraction, Sanger sequencing

Language: Proficient in French conversation, reading, and writing; Certified in French level B1.2 by La Sorbonne in Paris

Teaching: Certified Instructor with The Carpentries

Teaching Experience (* indicates upcoming)

Data Carpentry Genomics Workshop* , Bioinformatics Training Program at JAX (Instructor)	Nov. 2021
Introductory Statistics with R , Bioinformatics Training Program at JAX (TA)	Sept. 2021
Introduction to R and RStudio , Bioinformatics Training Program at JAX (TA)	June 2021

Volunteer Work and Extra-Curricular Activities

Math Motivators , The University of Connecticut	Oct. 2017 - May 2019
• Tutored high school freshmen from underprivileged schools in Hartford, CT	
iGEM Genetic Engineering Team , The University of Connecticut	Sept. 2016 - Dec. 2017
• Developed and presented a project proposal for the iGEM jamboree with a team of students	
Rubyfruit A Cappella , The University of Connecticut	Sept. 2016 - May 2020
• Elected as President (2019-2020), Assistant Music Director (2018 - 2019), and Treasurer (2017- 2018)
